

## ABC ADVENTURES PART 2

Bring the learning to life! Augmented reality adds an interactive component that strengthens retention. Visit [www.ilovepolyblox.com](http://www.ilovepolyblox.com) to learn how to experience the augmented reality embedded in this workbook!

K5+ WORKBOOK FOR ENGLISH CLASSIC WOODEN POLYBLOX

# About the Creators

## Laresa Tapia

Inventor Laresa remembers the wonder she felt as a child volunteering with her mom for children with autism. That experience planted early seeds of empathy and joy for the different ways we interact and learn. Years later as a new mom herself, she hoped to recreate that feeling for her son, Enso. After purchasing many separate learning toys for sign language, shapes, colors, numbers, vowels etc. she wondered how the information could be combined in a meaningful way. With a 20 year+ teaching background to complement her love of research she began iterating the idea. The first Polyblox prototypes were a huge success with her son, Enso and his teachers. Polyblox is now an award-winning educational tool with added features like augmented reality and considered a must-have for parents and educators who want to introduce the spirit of joyful inclusion into early learning.

Laresa lives with her husband, their son, a feisty bengal cat and a cheery bichon in sunny Florida. She is passionate about STEAM, empathy in education, technology and supporting women in business

## Amie Archbold

Amie is the Curriculum Coordinator for Polyblox Totems. She is a fun and energetic educator with over 13 years of experience in teaching early learners. She has a bachelor's degree in Interdisciplinary Studies from the University of Central Florida. Her areas of study were Education and Behavioral and Social Science. Amie loves helping to sculpt little minds and is currently a Kindergarten teacher in Central Florida. She believes in whole brain teaching and activating the entire body while learning. Her fun and creative worksheets target specific learning outcomes that not only meet state standards but also creates a foundation for learning. She believes learning should be fun and also engaging. Several age appropriate skills are woven throughout each workbook ensuring your early learner is consistently challenged and rewarded with success after the completion of every worksheet.

# A Note to Parents and Educators

## About this Workbook

Polyblox ABC Adventures Part 2 is an age appropriate introduction to the Polyblox Totems. Your young scholar will begin to acquire the knowledge necessary for a successful year of preschool as they explore the unique design of this amazing educational learning tool.

Each letter is introduced with a coloring picture. This allows your scholar to intuitively acquaint themselves with the letter shapes and sounds and develop the necessary fine motor skills that are needed for writing. Directly correlated to the coloring page you will find an activity sheet with a Polyblox totem image that has blank boxes. Prompt your scholar to match the missing boxes to the correct location using their own Polybox totem as a reference.

This workbook guides your child through the following skills:

- Fine motor control
- Hand-eye coordination
- Spatial awareness
- Letter recognition
- Letter sounds
- Problem solving
- Patterning
- Visual Perceptual Skills- Able to distinguish letters vs Numbers
- Increase in attention span and focus
- Visual Motor Integration- able to copy a picture or writing (braille section)
- Increase in letter Knowledge- understand letters make words

## Tips

- Allow at least 5 minutes of free play with the totems before you begin the worksheet.
- Only complete 1 letter totem per day.
- Ask the scholar to color the picture associated with the totem before they begin matching.

This allows the young learner to organically explore the sound associated with the related totem on the adjacent page.

## Best practices

- Note that each scholar is holding their crayon, marker, or pencil correctly.
- Encourage your child to "Stay in the lines" while coloring. This requires more control from the hand and further develops the fine motor skills and specific muscles needed for writing.
- Ask the scholar about the picture they are coloring.
  - Review the initial sound; "a-a-apple"
  - Categorize the picture; is it food / animal / object / size / etc.
- Notice whether the scholar is able to draw straight lines when matching.

## Are they engaged?

Watch to see if they glance up for validation as they work. Offer meaningful feedback for activity victories to further motivate the scholar to continue the workbook pages each day.

## Praise Prompts

"Way to go! Your handwriting stayed in the lines!"

"You are great at making patterns"

"Wow, you were able to copy the picture perfectly!"

"How does it make you feel to do this correctly?"

"What was your biggest challenge?"

"What did you most enjoy learning?"
